

Preparations, Bonding and Materials for Indirect Restorations

This course provides rules for successful tooth preparation for ceramic materials. An overview on bonding and cementing systems is given, with emphasis on techniques for indirect ceramic restorations. Material indications and production methods are discussed with information on the latest types of ceramic materials available in NZ.

CPD points:	4.5 (per course)
Fee:	\$395 incl GST
Date	Auckland April 10th, September 4th Precision Dental Laboratory Lvl 1/10 Auburn St. Grafton
	Wellington May 22nd Precision Dental Laboratory Lvl 2, Quinovic House 32 Kent Terrace. Mt Victoria
Start time:	1:00pm - 5:30pm
Max. Attendees:	6

Course Overview

Learning Objectives

Learn how to correctly shape a tooth for a ceramic restoration. Understand types of ceramic materials and their physical properties. Gain an insight into scanning for CAD/CAM and digital production of dental restorations. Discuss bonding and cements for all ceramic restorations and learn techniques for success and how to eliminate common errors. Learn practical steps & tips required for bonding a restoration onto a tooth.

Learning Outcomes

Be able to choose the correct ceramic material for a given clinical situation. Be able to prepare a tooth with the optimal shape for a ceramic crown or onlay. Be able to bond an all-ceramic restoration. Improve communications with your dental lab through increased knowledge of ceramic materials and their properties.

Presenter
Dr Karen Harris BDS,
ISCD International
CEREC Trainer,
Fellow International
Congress of Implantologists

Dr Karen Harris graduated from Otago in 1980 and bought her Wellington based dental practice in her last month before finishing dental school. After 29 years she sold her practice and moved to Auckland, where she established City Dental Lounge in the Auckland CBD.

Dr Harris focuses on using the latest technology, methods & materials to provide ideal cosmetic and functional solutions for her patients. She combines 3D cone beam technology with digital scanning to deliver an extremely high level of service. Alongside her general & cosmetic dental focus, Dr Harris is able to provide added services such as comprehensive orthodontics, implants & endodontic options.

In the last twelve years, Dr Harris has presented and trained many dentists at numerous New Zealand and International meetings including Sydney, Coolum, Greece & Berlin.
